Conmat batching plant pdf

KYB Conmat Stationary Concrete Batching Plant that guarantees the high-quality construction of Vrindavan Chandrodaya Mandir 700 feet high in Mathura in UP Vrindavan Chandrodaya Mandir, which is supposed to be the tallest temple in the world, is under construction in Vrindavan, Mathura. Involving an investment ₹300 crore, it will be one of the most expensive temples in the world by ISKCON Bangalore. It has an footprint of about 5 acres and an area and built of 5,40,000 square feet. The temple will bring liveliness to the area with a number of festivals and religious activities throughout the year. Kyb-Conmat's stationary concrete lot plant selected for the Vrindavan Chandrodaya Mandir project With a height of 213 meters (700 feet) and 70 floors, the temple will have a capsule elevator to take visitors to the Viewing Gallery at the top of the temple, giving an immersive luminous experience of 3D sounds and lights of the planetary system described in Vedic literature. A lookalike of vrindavan's verdant forests will be recreated around this magnificent temple with descriptions in Srimad-Bhagavatam, with the twelve forests of Braj. A Krishna Lila Theme Park will include themed storytelling areas, musical fountains, gardens, lawns, and water bodies. Other attractions will be a Yamuna stream with boating, Braj heritage village, a 'goshala' to recreate the atmosphere of Lord Krishna's Vrindavan, a Krishna Heritage and Bhagavad-Gita Expo museum, at conferences, and a Krishna Heritage Studies Center. KYB-Conmat's stationary concrete lot plant - saves construction time, labor and total capital cost the stationary cost of the CRP-900 ILS concrete lot plant for the construction of the prestigious project. The project, not conventional design, rather is sculpted, circular and three-dimensional, which makes it quite challenging; such architecture is being developed for the first time in India, and is internationally with its beautiful architecture, comments Salaj Verma, Senior VP-Sales at KYB-Conmat Pvt Ltd. He adds: The VCM team wanted to collaborate with a renowned concrete company, which would be experienced and committed to the project. We are proud to be associated with VCM and are able to offer a range of design machines such as our concrete batch plant and transit mixer. Our equipment saves construction time, labor and the overall cost of capital. Informs that the VCM team, together with the project manager, visited KYB-Conmat's headquarters in Vadodara, as they wanted special SCC concrete for the temple. Self-compactable concrete is highly sliding, not segregated, and can spread evenly to fill the case in shape and encapsulate reinforcement without any mechanical consolidation. Satisfied with the process and the final product, the Mathura team placed an order for 90 cubic meters/hour of KYB Conmat and three transit mixers of 7 cubic meters capacity, says Abhishek Prakash, Project Manager, VCM, KYB-Conmat KYB-Conmat and robust products are the most reliable, and the company is also the best service provider. They offer timely after-sales service and their spare parts are easily available. We wanted to collaborate with a (renowned) company for this most prestigious project. KYB's stationary concrete lot plants are used worldwide for infrastructure construction, especially concrete roads, subway railways, skyscrapers, dams, and other crucial projects.
